

## CLAIMS

1. An electronic appliance, comprising:

5 a first operation switch that allows an operator to select a first state assigned one setting value or a second state assigned a plurality of setting values;

a display that displays the setting values assigned to the second state, when the second state is selected with the first operation switch;

10 a second operation switch that allows the operator to select any one of the setting values displayed on the display; and

a controller that sets the setting value assigned to the first state as an operating condition, when the first state is selected with the first operation switch, and sets the setting value selected with the second operation switch as the operating condition, when the second state is selected with the first  
15 operation switch.

2. The electronic appliance according to claim 1, wherein the controller allows the display to show a display that prompts the operator to select a setting value with the second operation switch, when the second state is  
20 selected with the first operation switch.

3. The electronic appliance according to claim 2, wherein the display that prompts the operator to select a setting value with the second operation switch includes a picture symbol.  
25

4. The electronic appliance according to claim 1, wherein the controller varies a display embodiment of a setting value to be displayed on the display before and after setting the setting value selected with the second operation switch as the operating condition.  
30

5. The electronic appliance according to claim 1, wherein the electronic appliance is a camera, and  
the setting value is at least one of a shutter speed and an aperture value.

5

6. The electronic appliance according to claim 1, wherein the electronic appliance is a mobile telephone terminal, and  
the setting value is a transmission destination identifier.

10 7. The electronic appliance according to claim 1, wherein the electronic appliance is a television receiver set, and  
the setting value is a broadcast channel.

8. The electronic appliance according to claim 1, wherein the electronic  
15 appliance is a household electric appliance for cooking, and  
the setting value is a cooking menu.

9. The electronic appliance according to claim 1, wherein the electronic  
appliance has a plurality of operation modes, and  
20 the setting value is the operation mode.
